

# PRECISION FIELD MANAGEMENT

GRAIN TRACKER™;  
WEIGHING SYSTEMS TRACK DATA  
FROM PLANTING TO HARVEST

NEW!

 **AUTOLOG™**  
Automatic Start/Stop Function

**Digi-Star®** 

Providing measuring solutions to optimize agricultural performance!

# Precision weighing and management systems specific

## MODEL GT 460

A full-featured grain cart interface system that provides significant field recording and management benefits for producers and custom harvesters.

### NEW! Digi-Star's AutoLog™

#### Automatic Start/Stop Function (patent pending)

No need to remember to push the Start/Stop button when unloading your cart. With the use of a magnetic switch and new software, it is done automatically... no matter who is operating your grain cart.

Easy to install switch wired into the GT460 indicator with the AutoLog™ software is all you will need.

### **AutoLog™** Automatic Start/Stop Function

#### Operational Benefits

- A large multi-line display can show the last record, what is currently being loaded and can provide paperless printer capability
- Navigational keypad to review previous loads or edit field information
- FIELD button for viewing and changing the 26 character alphanumeric data field
- CHECK feature to check or calibrate the combine's yield monitor
- QWERTY keyboard for easily editing or changing field information
- Time and date stamp data for verification for insurance records or custom harvesting purposes
- Accumulation of weights per field entry
- Bi-directional field names from PC to indicator via USB

View and change the 26 character alphanumeric data field

AutoLog™ Convenient Automatic "Start • Stop" Function (patent pending)

Check function to calibrate the combine yield monitor

View and change the 6 character alphanumeric data field

"QWERTY" and numerical keypad to easily change field information

USB port to transfer data to a flash drive

#### Unique data management via USB or DDL port

The Grain Tracker system allows easy download of collected data via a USB or DDL port to a flash drive memory device. Proprietary software easily installed on a PC captures the recorded data and organizes it into reports in Excel or PDF format.

- Easy training for operators
- Bi-directional field names via USB
- Large multi-line display to easily view current and previous records
- User-friendly functioning
- PC software provides reports in Excel or PDF format

# ally designed for grain cart and harvesting applications

## MODEL GT 400

A uniquely designed grain cart interface system that provides significant field recording and management benefits for producers and custom harvesters.

### Easy to use and train operators with the START•STOP button (patent pending)

Pressing START sets the tare to document a load. When unloaded, pressing the STOP button signals the system to record the load data including weight, time, date and field reference.

The data can be sent to an attached printer or DDL if a serial port is on the unit. The display then automatically returns to the gross weigh mode.

### Operational Benefits

- FIELD button for viewing and changing the 6 character alphanumeric data field. Use button arrows to move to and adjust each character to create the desired code
- Symbols positioned with the keys also help users quickly learn the operation with limited training
- Accumulation of weights

- User-friendly functioning
- Easy training for operators
- Uniquely designed for grain carts

Symbols on the keys facilitate learning

Convenient "Start • Stop" feature (patent pending)

View and change the 6 character alphanumeric data field

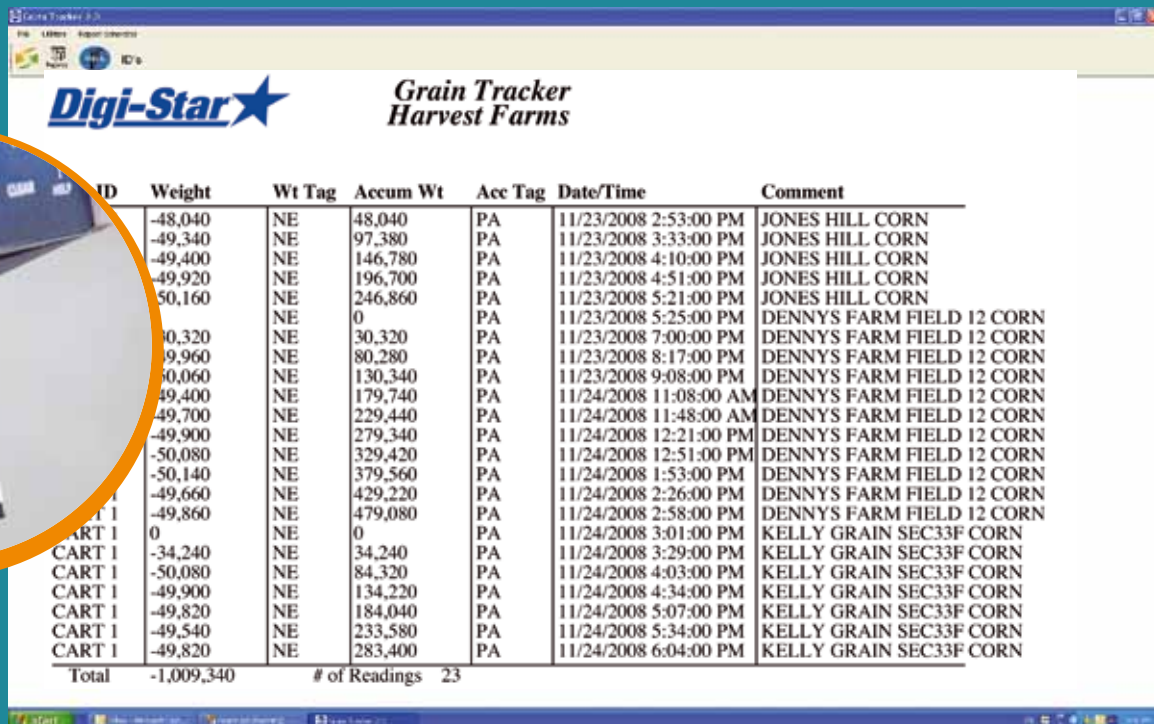

# The value of grain weighing systems

## MODEL GT 460

Transfer accumulated data to a flash memory device via a USB port.

Software is provided to install on your PC allowing you to quickly upload recorded information from the flash memory device and easily print out reports in Excel or PDF format. Sample report shown below.

The screenshot shows the Grain Tracker software interface with a table of weighing data. A circular inset on the left shows a Digi-Star USB device connected to a weighing scale.

### Grain cart weighing systems provide benefits:

- Measure crop yields
- Compare individual fields, soil types, seed hybrids, fertilizer types, tillage equipment and methods
- Know the exact weight of grain going into and coming out of on-farm storage
- Measure share-cropping shares
- Keep your road loads legal weight
- Measure crop damage for insurance documentation
- Document each and every load
- Provides peace of mind, eliminating guesswork
- Saves time by weighing in the field vs. transport to a platform scale
- Helps make more informed decisions for managing land for best performance and profitability

### Air seeder weighing systems help operators to:

- Ensure even seed distribution during hopper filling
- Calculate remaining hectares to plant by knowing the accurate seed weight
- Compare kilograms with hectares planted
- Measure seed used between farms and partnerships
- Perform quick and easy installation
