Seed Tracker™
Weighing System for Seed Tenders

DIGI★STAR

PRECISELY

Precision automated management system specifically designed for seed tenders.

MODEL ST 3400 A full-featured weighing and management tool designed specifically to track seed weights...up to ten individual boxes or bulk bins

For all types of seed tender equipment.

Automatic shut off indicator

Convenient no-fail "Start • Stop" Function

Manage up to 10 bins

View and change the 6 character alphanumeric data field

Simple, programmable pre-sets

Optional thermal printer and remote are available.

Time-Saving Benefits

- Reduces co-mingling of seed varieties...preset amounts with less clean-out
- Eliminate downtime with convenient "no-fail" Start•Stop function
- Measure seed used between farms and partnerships
- Manage multiple farms with downloadable information
- Easily verify quantity of seed delivered

Unique Digi-Star Features

- Compatible with seed tender equipped with variable throttle systems
- Preset weights with pre-programmable auto shut-off for delivering precise quantities of seed...time-after-time!
- Accurately know weight of remaining seed in bins
- Accumulation of weights per field entry, scale always resets to the last preset entered weight for each hopper load
- Navigational keypad to review previous loads or edit field information
